NORSK FORENING FOR KLINISK SEXOLOGI
NORWEGIAN SOCIETY FOR CLINICAL SEXOLOGY

National Member Report 2019 for NACS General Assembly, Norwegian Society for Clinical Sexology – NFKS

One of the most discussed sexological topics in Norway this last year, has been how and where trans people can get gender affirming treatment. NFKS are represented in the task force working with new guidelines, and hopefully the situation will be better in the near future as the work soon will be finished.

The general assembly this year focused on how NFKS could continue our work on developing the organization. It is still important to strengthen the internal work and establish local professional networks all over the country.

As in Denmark and Sweden, Norway also has an annual public meeting where NGOs and politicians meet to discuss cultural and political issues, Arendalsuka. In 2019 we arranged and a panel discussion. Both politicians and sexologists participated, and discussed how sexological treatment can be made more available for the general public, and where they can find qualified sexologists.

NFKS is one of the partners who works with establishing a master program in sexology in Norway. The work started this year and will hopefully make it possible to get a masters degree in sexology in the close future.

Three other events worth mentioning from last year, arranged by others than NFKS:

- Nyt-festivalen – a festival promoting sexual pleasure in all possible ways: https://www.nytfestivalen.no/
- SOSH-dagene – promoting sexual health in general: https://www.facebook.com/soshdagene/
- vulva.no – a webpage for both patients and healthcare professionals working with vulvodynia.
